

Vienna July 1 - 5, 2019

Vienna International Centre, Austria

International Conference on Drug Prevention, Treatment and Care: Inspiration & Direction

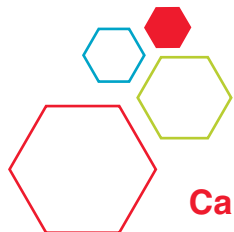

Join drug demand reduction professionals from Europe and around the world for five days of plenary sessions, networking, exhibits, culture and community. The conference will bring together national and international experts in drug prevention, treatment and care and will feature a broad range of topics and formats.

The conference will include keynote sessions on:

- Genetics and neurobiology, Prevention and treatment innovations,
- Prevention and treatment systems, Social determinants,
- Law enforcement, criminal justice and health cooperation,
- Overdose prevention, Special populations

Our international partners will provide evidence-based and high-quality training in the following areas:

- Family-based, school-based & media-based prevention
- Prevention interventions in Europe
- Counselling skills for addiction professionals
- Policy-maker training in nature, prevention and treatment of drug use disorders
- Treating adolescents with substance use disorders
- Community anti-drug coalitions
- Children's substance use prevention and treatment
- Motivational interviewing skills
- Advanced clinical skills and crisis management
- Drug-free workplace

Call for abstracts!
